

# Flavio Belvedere

Co-CEO,  
ABCS Srl

ABCS Srl is a company built by a team of professionals coming from the scientific instrumentation and the material science fields.

We started our job in molecular and Raman spectroscopy on mid '90 and never stop to love these analytical techniques.

ABCS is particularly active in the PAT market offering a complete solution to customers for industrial process monitoring and control, from R&D up to the plant.

We set process control for pharmaceutical and biopharma, food and chemical industries.

# ***Why have you chosen to provide Indatech solutions?***

**We represent Indatech with passion and dedication offering multiple and unique technologies: from the patented NIR-Chemical Imaging with 2D detector to the PAT Raman solution and the unique UV probe; those analytical tools allow us to deliver real-time and comprehensive process understanding by monitoring physicals and chemicals parameters.**

# *What are the current/future projects you have with Indatech ?*

We are now working to provide on line concentration measurement for the upstream and downstream vaccine manufacturing adopting the **Asuryan** probes in Biopharma.

Other projects are on going to provide direct lyophilized inspection by **SamSpec** in Pharma; We're looking also at chemical and polymer plant for the monitoring of plasticizer reaction process.
