

Dr John Andrews

Managing Director, Clairet Scientific Ltd

Clairet has 30 years' experience in PAT using molecular spectroscopy. We work with pharmaceuticals, chemicals, environmental food and academia. We have completed over 150 PAT projects here in the UK.

Why have you chosen to provide Indatech's solutions?

We were very impressed with the design of the Asuryan UV-Vis instrument and further impressed when we evaluated a system here in our lab. Indatech are a great company to work with, very knowledgeable people providing a high level of support for us and our customers.

What are the current/future projects you have with Indatech ?

We are looking to leverage our experience of UV-Vis applications such as crystallisation, supersaturation control and cleaning validation with the performance and specification of the Asuryan.
